Class X
SKCIC, Agra, Uttar Pradesh

04/2015   *Agra, India*

Class
Institution/Place of Education

PERSONAL PROJECTS

Online Photo College Tool (11/2020 - 03/2021)
- As many of us want to post photo collages in social media, it's useful to have an online tool to do simple image combinations without needing to open an image processing program. This collage tool will enable the user to upload images and stitch them together in a neat row or a column.

Weekly newsletter Summary email (08/2020 - 09/2020)
- If you're like most developers, you're subscribed to a number of email newsletters to keep you up to date with the latest tools and frameworks. These are useful, but can quickly clog up your inbox over time. This project will have you build a serverless app to consolidate your email subscriptions into a single weekly summary email.

Personal website with randomly generated design (02/2020 - 03/2020)
- We're going to build a simple personal website with a twist, by including a randomly generated stylesheet that updates every hour, totally refreshing the design of your website.

Build a custom Google Maps theme (01/2020 - 01/2020)
- You'll use Google Cloud Platform to create the map, and also use the Google Maps JavaScript API to load the map on a website

Build a screenshot pipeline (01/2020 - 02/2020)
- Set up a CI/CD workflow which will produce a screenshot of your homepage and keep it updated as you keep changing the code. This kind of always-up-to-date screenshot can be useful for your README
